

The Property Registry (Teranet Manitoba) eRegistration project team nominated for a Manitoba Service Excellence Partnership Award

We are delighted to announce that the eRegistration Project Team has been nominated for a Partnership Award from the 20th Annual Manitoba Service Excellence Awards.

Established through the Service Quality Partners and Business Transformation and Technology, the Manitoba Service Excellence Awards recognize the hard work, dedication and outstanding efforts of all Manitoba Government employees who deliver service excellence every day. The Partnership category emphasizes innovative partnerships with one or more external partners that promote excellence, foster better quality of life, more effective government programs and services, and a strengthened public administration system.

As Manitoba's new electronic land titles submission system, eRegistration is the result of a public-private partnership between the Government of Manitoba (Manitoba Justice) and The Property Registry (Teranet Manitoba).

Over 90% of land title registrations are now collaboratively created online and submitted electronically from anywhere in the province, providing convenience to clients by avoiding the time and cost of submitting paper documents in person.

eRegistration and the eRegistration Project Team were nominated by Gail Anderson, Assistant Deputy Minister, Manitoba Justice and honoured at a luncheon held on June 8, 2018.

Congratulations to the project team and thank you for all of your hard work in bringing eRegistration to life!

Dennis Barnhart
General Manager
The Property Registry
