User Guide

TERANET MANITOBA

A SERVICE PROVIDER FOR THE PROVINCE OF MANITOBA

Updated: January 24, 2024
Version 2.04

Contents

Introduction

The purpose of this user guide is to provide a basic overview of the main functions and features of eRegistration.

Common acronyms and terminology

We use a few common acronyms that you will see in this guide:

PDS	Plan Deposit Submission
PPR	Personal Property Registry

Browser requirements

Please visit our website for the most recent browser requirements.

Scanning requirements

Please visit our website for the most recent scanning requirements.

Smart form requirements

Please visit our website for the most recent smart form requirements.

What is the difference between a smart form, a scanned paper form and an eForm?

eForms	All forms uploaded into eRegistration (smart forms and scanned paper forms are all electronic forms, or eForms for short).
Smart forms	One of four electronically fillable forms: eTransfer eCaveat eMortgage eDischarge eRegistration can automatically read registration details right from the form. When uploading smart forms into eRegistration you should always upload the original PDF of the form and not a scanned copy. Only signature pages and additional evidence should be scanned to make a digital copy.
Scanned paper forms	Any other land titles form that has been completed manually (typed or printed) and then scanned to make a digital image (PDF). eRegistration cannot read any registration details from the scanned paper forms so some extra information must be provided when uploading.

eForms
└── Smart forms
└── Scanned paper forms
Navigation tips

Look for these icons as you navigate eRegistration:

Hover over these icons at any time to learn more information about:

- A registration process.
- A tip for completing your submission.
- A warning or an error message.
- Other additional information that is not currently displayed on the screen.

Other helpful features in this guide:

Ⓣ Look for this symbol for details on how a particular feature will benefit the Transfer smart form, which is unique in that it's a two-party eForm.

Tip	Look for this for an important tip.

Landing page

1. The eRegistration landing page provides useful information such as:
   - Scheduled outages and outage notifications.
   - Announcements.

2. A link to several useful reference materials can be found on the landing page including:
   - The eRegistration user guide.
   - User guides for all four smart forms.
   - A link to the eRegistration video tutorials.

3. From the landing page you can navigate between:
   - English and French.
   - Teranet Manitoba's online applications (click on the three bars on the left side of the page).
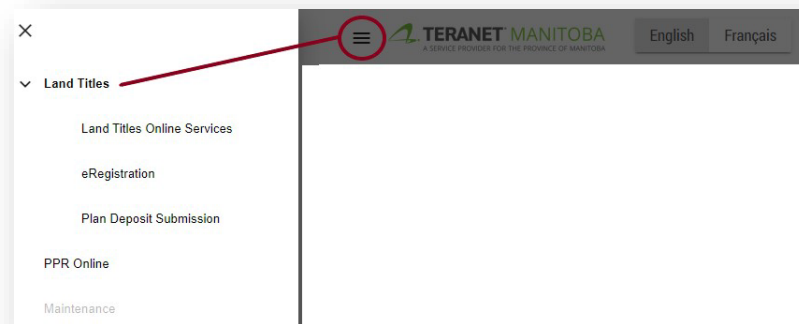

4. The bottom of this page provides other useful links including:
   - The homepage of the Office of the Registrar-General.
   - Our main website.
   - Contact information.
   - Privacy statement.
   - Terms of Use.

You can view our contact page by selecting the icon, which is located next to the login button.

A note about eRegistration's hour of operation: While eRegistration is generally available 24/7, the regulations to *The Real Property Act* specify land titles registration hours. If you submit a series for registration outside of the registration hours, but within eRegistration's hours of operation:

1. As with every submission, you will be provided a confirmation number.
2. Your registration will be placed in queue prioritized on the time it was received.
3. The series will be registered in priority order as soon as registration hours resume.

Here is what the landing page looks like:
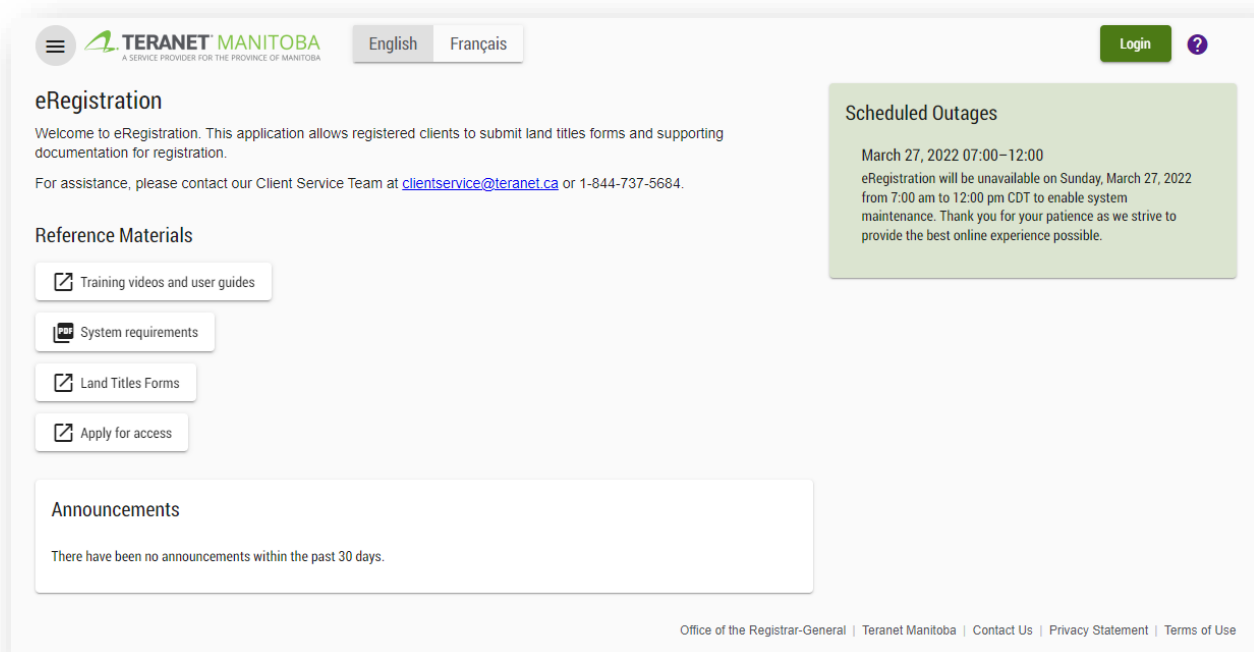

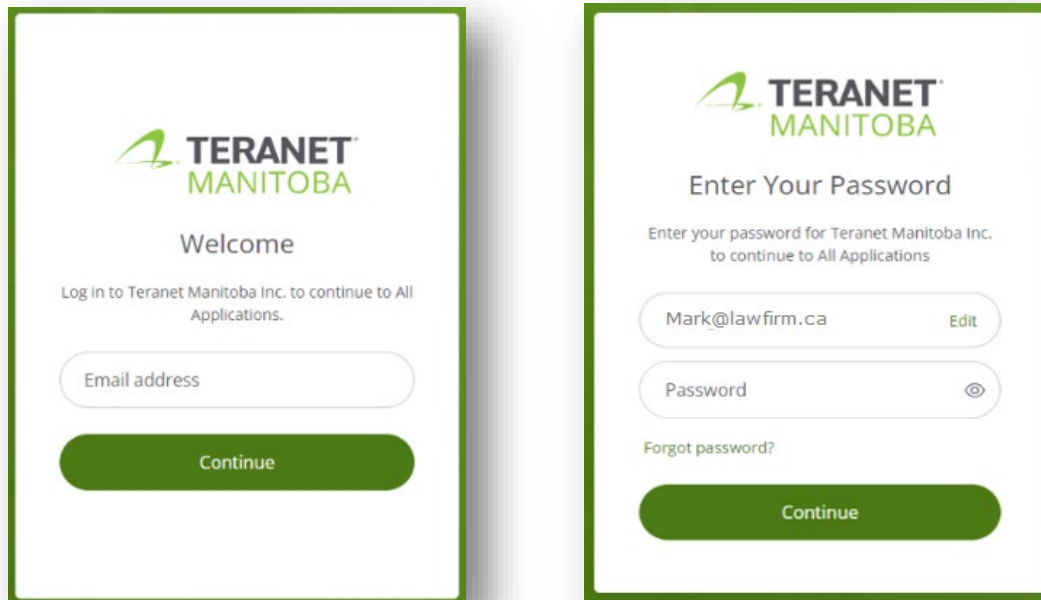

Login process

Log in using the same email address and password across all our online services.

To log in, follow these steps:

1. Click the **Login** icon.

2. Enter your **email address** and click **continue**.
3. Enter your **password** and click **continue**.

Password requirements

To help ensure a secure log in process, our application passwords must meet the requirements defined on the password reset screen.

In addition, commonly used passwords such as Password1 or passwords that contain your name are also not acceptable. If you get a notification that your password does not meet requirements, you may need to increase the difficulty.

Who should have an online services user ID?

Anyone in your firm who:

- ✓ Searches our online services.
- ✓ Registers using our online services.
- ✓ Is a Manitoba Land Surveyor.
- ✓ Is the firm administrator.
- ✓ Is the account administrator.
- ✓ Is a supervising lawyer to land titles transactions.

Basically, anyone in your firm who is expected to use, oversee, or manage Teranet Manitoba's online services and/or accounts needs a user ID.

A note about sharing user IDs: If the same user ID is used to log in to multiple sessions, the first session will be terminated and the following notification will appear:

Session Ended

Your account has been used to log in from another computer or browser. You have been logged out of the application for security reasons. You will now be redirected to the landing page where you may log in again.

OK
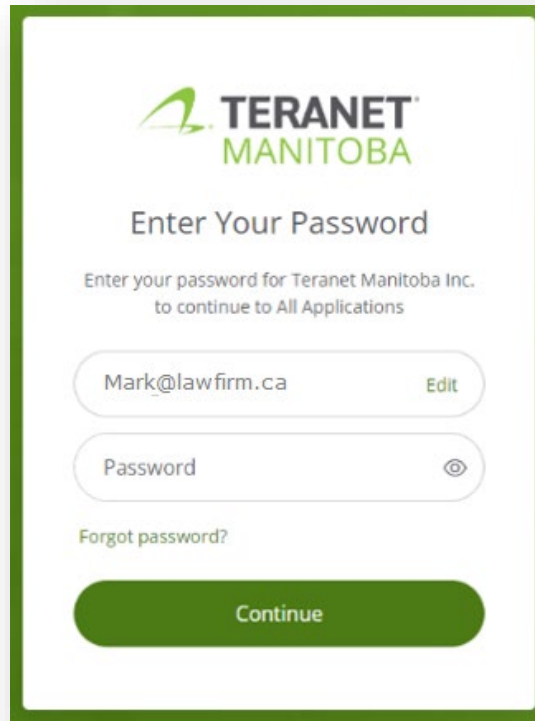

Remember that there is no cost for individual user IDs for our online services, so sharing user IDs is not necessary.

Password reset process
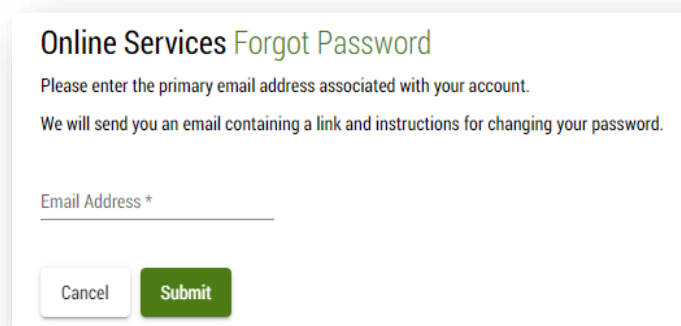

To reset your password, follow these steps:

1. Navigate to the login menu for our online services.

2. Click the 'Forgot Password?' label.

3. Enter the email address associated with your account, and a secure link will be delivered to your inbox.

4. Click the link in this email to create a new password.

Notes:
- The link to create a new password expires after two hours. If the link has expired, you'll need to submit a new request.
- Contact our Client Service Team if you are locked out of any of our applications due to too many password attempts.
- You should receive an email with a link to reset your password within five minutes. You won't receive the email if:
  - The email address you provided contained a typo.
  - The email address you provided does not match the email associated to your profile.
  - The email address you entered is shared with another user.
  - The email with the link to reset your password was sent to your junk folder.

Workspace

Once logged on you will arrive at your **workspace**. The workspace will help you organize your files into electronic folders.

Main features

From the workspace page you can complete multiple tasks:

1. Navigate to other online services such as Land Titles Online.
2. View all previously created files including those already submitted for registration.
3. Create new files.
4. Manage existing files.
5. Filter your file list to find a certain file.
6. View file sharing ⬳ and file submission ☁ information.

Closing Date ↓	File Number	Description	Registration Office	First Registration Number	
2022-05-31	CD- 2022- Rempel	Smith file	Brandon		
2022-04-30	DF-2022-Main	Walters file	Winnipeg		
2022-04-15	EQ-2022-Alder	Reese file	Winnipeg		☁
2021-11-30	PF- 2021-Waterfront		Winnipeg		👥

Search for a file

By default, all of your files will be listed chronologically by closing date (if you have entered one). Select any of the available headings to re-order the list by that value.

To search for a file, navigate to the [🔍 Filter file list] field and enter any part of the closing date, file number, description or registration office of the file you are looking for.

- As you enter your search criteria the folder list will automatically filter to show any files that match or partially match your search criteria.
- Select the file you are looking for once it becomes visible in the file list.

To reduce clutter, you can hide files that have already been submitted for registration from your list by selecting the exclude files checkbox:

☑ Exclude files already submitted for registration . This is selected by default.

Registration number

The registration number column will remain blank until a series is registered. Once the series is registered, the first registration number in the series will be auto-populated into your workspace.

Closing Date	File Number	Description	Registration Office	First Registration Number	
	test		1-Winnipeg	7001212/1	
2018-03-14	45555	63 River Road	1-Winnipeg	7000078/1	
2019-04-30	Mortgage		1-Winnipeg	7001215/1	
2019-10-31	Smith-123	Smith-Watson transfer	1-Winnipeg	7001461/1	

☐ Exclude files already submitted for registration   ⓘ One or more files have been interrupted during the submission process

All times are Central Time Zone (UTC -6:00 Standard / UTC -5:00 Daylight Saving)

In order to view files that have been submitted for registration, you need to **deselect** the box that hides them from the default view.

☐ Exclude files already submitted for registration

Important restrictions

Files will be deleted no earlier than seven calendar days after registration is completed and the documents have been accepted. Files will also be deleted no earlier than 60 calendar days after documents that are unacceptable have been rejected.

Create and submit a file for registration

This section will describe how to create a new file and submit it for registration. The main steps included in this section are:

- Create a file
- Upload forms
- Add documents (signature pages and supporting documents)
- Edit file contents
- Submit a file for registration

Create a file

Follow these steps to create a new file:
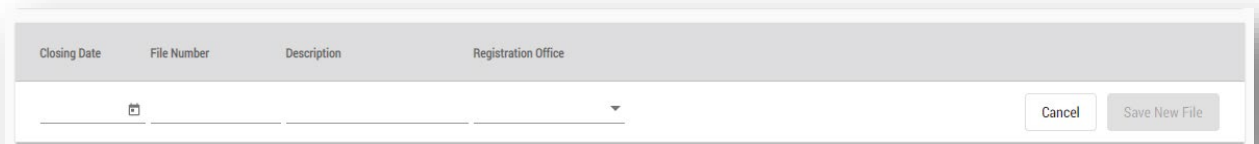

1	Click on
2	Identify your file using the fields provided including **closing date, file number** (mandatory), **description** and **registration office** (mandatory) • **Registration office** is the land titles district in which the lands are located. • You can only select one office per file. If you are submitting a form that needs to be registered in more than one office, you'll create a separate file for each office and submit the form multiple times.
3	Click on to save your file. • You may also **cancel** the entry.
4	Once saved the new file will appear in your workspace in your files list.

Tip	All of the file creation fields are searchable. Enter details into these fields that will make your files easy to find and filter.

Upload forms

You can now add all your eForms to the file. There is no limit to the total number of eForms you can upload per file. You can upload any combination of smart forms and/or scanned paper forms.

Upload scanned paper forms

To upload scanned paper forms:

1	Click **Add eForm**.
2	Select **scanned paper forms.**
3	Start the upload process by selecting **Add to Upload List**, or drag and drop your form into the list.
	• Smart forms shouldn't be uploaded as scanned paper forms.
	• This action does not upload the form to the file, it only adds it to the upload list.
4	Select the instrument type for each scanned paper form from the drop-down menu. You may add a description if you want. It will be of particular assistance if you upload several instruments of the same type and need a way to differentiate them.
	• eRegistration isn't able to check to make sure you have labelled your form correctly. Please take care to ensure forms have the correct instrument type as what you call it here is what it will be registered as. Incorrectly labelling a form may result in fee changes and/or delay during the examination stage.
5   Click on **Upload eForms** to upload your forms from the list.

- At this point eRegistration will scan each for viruses.
- Your list of uploaded forms will build on the left side of the screen.
- The forms will be listed in the order in which they are successfully uploaded and not necessarily the order in which you've added them.
- You can change the order any time before submitting.
- You can also remove or add additional forms at a later date.

---

6   Your scanned paper forms are now uploaded.

---
7   Click on one of the scanned paper forms from the list on the left side of the screen.

---
8   Click on **Edit Details** to provide some basic details about each scanned paper (see [Appendix A](#) for examples of the fields required for our most common scanned paper forms).

---

9   Click **Save Details** to save your changes.

- Repeat steps seven, eight and nine for each scanned paper form

You are ready to add supporting documents!

Upload smart forms

To upload smart forms:

| 1	Click .
2	Select **smart forms.**
3	Start the upload process by selecting , or by dragging and dropping forms into the list. • You should always upload the <u>original locked PDF version</u> of the smart forms and not a scanned copy. The locked PDF version of the smart forms will include blank signature pages which will be ignored by our employees. The completed signature pages are the only part of the smart form that will be scanned after signing (see add documents for more information). • This action does not upload the forms to the file, it only adds them to the upload list.

4   Click on **Upload eForms** to upload your forms from the list.

- At this point eRegistration will scan each for viruses.
- Your list of uploaded forms will build on the left side of the screen (in the same place as any scanned paper forms).
- The forms will be listed in the order in which they are successfully uploaded and not necessarily the order in which you've added them.
- You can rearrange the order at any time before submitting.
- You can also remove or add additional forms at a later date.
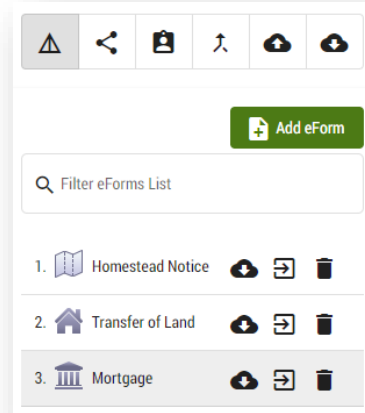

Your smart forms are now uploaded and you are ready to add signature pages and supporting documents!

Having trouble uploading a smart form?

There are two reasons you may get this error message:

⚠ Error: Not a Smart Form
1. You are uploading a printed then scanned PDF of a smart form. In order for eRegistration to recognize the smart forms, always upload the <u>original locked PDF version</u> of the smart forms and not a scanned copy. The locked PDF version of the smart forms will include blank signature pages which will be ignored by employees. The completed signature pages are the only part of the smart form that will be scanned after signing (see <u>add documents</u> for more information).

2. Old versions of smart forms may not function like smart forms in eRegistration, even though they look virtually the same as the current version. You should always use the most current version of our forms which are available on our website.

Add documents (evidence, signature pages, etc.)

Now that you've uploaded your eForms, you'll need to go through each eForm one at a time to add supporting documents and/or signature pages.

To add documents:

1 Go to each eForm in the list that requires supporting documents.
   - All smart forms require at least one scanned signature page to be uploaded.
   - Supporting documents that may be required include additional evidence (such as death certificates) or correction letters.
   - eRegistration doesn't check to make sure the correct additional documents have been added to each form.

2 Use **Add Document** for each eForm that you need to add documents to. All smart forms will require at least one signature page.

3 Select the **upload** option for new documents. You can also **copy** a document (other than signature pages) over from another eForm if it needs to be attached multiple times. For example, a correction letter affecting more than one eForm.
   - Documents must be in PDF format.

   New document → Upload   Copy ← Copy a document

4 Add documents to the upload list by selecting **Add to Upload List**, or by dragging and dropping the documents into the list.
   - This action does not upload the documents to the file, it only adds them to the upload list.

5 Select the **document type** from the drop-down list for each document.
   - You can also use the ⊖ to remove a document.

   Document Type

   | |
   Signature Pages
   Affidavit - Affidavit of Debts and Heirs
   Affidavit - Affidavit of Witness

6   Click on **Upload Documents** to upload your documents from the list.

- You may also **cancel** the upload.

- Not uploaded:

  0.6 MB
  Waiting...

- Uploading:

  0.6 MB

You have now uploaded eForms, signature pages and supporting documents to your file.

✔ **Documents Upload Successful**

All documents were successfully uploaded and they have been associated with the selected eForm.

Signature page.pdf
Signature Pages   ✔ Successfully uploaded

Return to File Details
You have the option to submit the file now. In some cases, you may still want to edit the contents or manage the file in other ways.

Ⓣ Transfer scenario (for two party transfers):

1. The transferor's agent completes the transferor's portion of the eTransfer and locks it. The signature pages are printed, signed and scanned.

2. The transferor's agent uploads the partially completed eTransfer (with the transferor portion locked) into a file in eRegistration, along with any supporting documents, including the signed and scanned signatures pages.

3. The transferor's agent changes ownership of the file to the transferee's agent.

4. The transferee's agent downloads the partially completed eTransfer from the file details page.

5. The transferee's agent completes the transferee portion of the eTransfer and locks it a second time. Any necessary transferee signature pages are printed, signed and scanned.

6. The transferee's agent uploads the completed and double locked eTransfer to the same file they downloaded it from, along with any supporting documents and scanned signatures pages.

This will replace the current partially completed version of the eTransfer with the completed and double locked version. None of the additional documents added by the transferor will be replaced or deleted.

---

7. The transferee's agent then uploads any other related eForms, such as an eMortgage together with associated signature pages and supporting documents.

Edit file contents

All eForms, signature pages and supporting documents have now been uploaded to your file. You still have the option to edit the file contents. Three general edit options are described in this section.

Feature one: For each existing file you have the option to:

✏️ Edit file details such as closing date, registration office or file number/description.

🗑️ Delete the entire file and all of its contents.

Feature two: For each eForm already uploaded you have the option to:

⬇️ Download a copy of the eForm.

➡️ Move the eForm to a different file (removes it from the current file).

🗑️ Delete the eForm from the file.

You can also add more eForms to the file using ![Add eForm].

Move eForm

Once the selected eForm **2. Transfer of Land** is moved from the current file into a target file

- the associated signature pages and supporting documents will be moved into the target file from the current file
- all existing submission errors and warnings of the moved eForm will be removed
- users of the current file will not gain access to the target file
- users of the target file will have access to the eForm and its associated signature pages and supporting documents

Target file

🔘 Existing file _____

⚪ Create new file

Closing Date

File Number

Description

Registration Office

Cancel   Move eForm

Feature three: For each supporting document already added to an eForm you have the option to:

✏️ Edit supporting document details such as document type.

🗑️ Delete the entire supporting document from the eForm it is attached to (will remain attached to any documents it was copied to).

You can also add more signature pages and supporting documents to the file using ![Add Document].

Here is an example of where to find these options in eRegistration:

Feature one

Feature two

Feature three

At what stage can you edit a file?

New file (not submitted)	Yes
File you have shared (but not submitted)	Yes
File that has been shared with you (but not submitted)	Yes, if you have been given permission (however option one can only be edited by the file owner); see share a file for more details.
Submitted file	No

Submit a file for registration 🔼

Follow these steps when you are ready to submit a file for registration.
1	Select 🔼 from the **file details** screen. • The file will be locked to edits for all other shared users during this process; meaning that no one will be able to change the file while you are submitting it.
	*You will be re-directed to the **registration order** screen.*
2	Use ≡ to re-order your eForms into the order you want them registered in (whatever order you select here is the order your eForms will be registered in). • Select an eForm to see the basic details. • You will not see this screen if you are only submitting one eForm for registration.
3	Once you are satisfied with the registration order click Proceed to continue. • You can also **cancel** or **save** your changes **and return** to the file details screen.
	*You will be redirected to the **submission details** screen.*
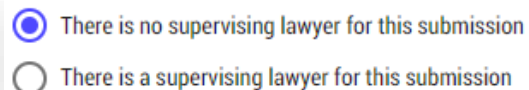

4	Identify if there is a supervising lawyer for the submission.
	• This option defaults to "no".
	• You must share your file with the lawyer before you can name them as the supervising lawyer.
	    ◉ There is no supervising lawyer for this submission
	    ○ There is a supervising lawyer for this submission
	• You can save this selection for future registration submissions.

5	Review fees and land transfer tax. • This is the amount you will be charged.
6	Indicate if any of the eForms are fee exempt. • This is not to be used for claiming land transfer tax exemptions.

7	Select either **deposit account** or **electronic funds transfer** as the method of payment. If you have more than one account number available to you, select the appropriate account number from the drop-down list.

- Only accounts your deposit account administrator has granted you access to will show in the drop-down list.
- The available balance will be displayed for each deposit account (only updated during prescribed registration hours).
- Only one payment type can be used per submission.
- You can select your default deposit account for future submissions.

8	Read and agree to the *Terms and Conditions*.

☐ I have read and agreed to the Terms and Conditions of eRegistration

9	When you're ready, click **Submit for Registration** .

- You can also choose Do Not Submit and you'll go back to the file details.

Your file has now been submitted for registration.

Submission confirmation

Once your file is successfully submitted (there are no submission errors or warnings), you will see a confirmation screen showing the details of your submission:

1. A confirmation number for the submission (you will also receive an email confirmation within a few minutes).
2. A summary of the submission.
3. A summary of the document submitted and the fees and taxes to be charged.

> **Tip** **A confirmation number is not a registration number.**
>
> You will always receive a confirmation number upon submission of a file, however registration is a separate process that occurs only during established registration hours.
> Once a file has been submitted for registration:
> 1. You will receive a confirmation number.
> 2. Your registration will be placed in queue, prioritized by the time it was received.
> 3. The series will be registered in priority order during regular registration hours. Once registered first registration number in the series will be auto populated into your workspace.

Submission errors ⊗ and warnings ⚠

Before a file can be submitted, eRegistration does a check for some basic errors. If a potential problem is flagged, a summary screen will list the errors and/or warnings.

There are two types of issues that may be flagged:

1. **Submission errors** ⊗
   - These errors stop a file from being submitted.
   - The file will not be accepted for registration until submission errors are addressed.

2. **Submission warnings** ⚠
   - eRegistration checks and flags possible warnings, based on the content of the smart forms, such as missing supporting evidence.
   - These warnings do not stop the file from being registered, they only act as a double-check.

Possible submission errors:	Possible submission warning:
The transferee section is not locked.	<Document Type Name> may be missing.
There is more than one copy of this eForm in this file.	
The signature pages are missing.	
Title and fair market value information have not been entered (for scanned paper forms).	
Title information has not been entered.	

How to handle the warnings and errors:
- If you **only have submission warnings** you should address the warnings and resolve them where that is appropriate. Otherwise, you can acknowledge them and submit your file as is. Keep in mind that there may be a problem with the submission. The warning will be flagged for our employees.

- If you **have even one submission error** (in conjunction with warnings or not), you must go back to the file details to correct it before you will be able to submit the series successfully.

Use Return to File Details to go back to the file details to view the errors and warnings. Any eForm that has been flagged will also be marked in the file details. Select any eForm to view more detailed information. These flags won't be removed until the registration process is initiated again. Upon re-submitting the file will be re-checked for outstanding or new errors and warnings.

These flags won't be removed until the registration process is initiated again. Upon re-submitting the file will be re-checked for outstanding or new errors and warnings.

Submission interruptions

If an interruption occurs during the file submission process (for example a loss of internet connection), your file will lock and the file submission error image will appear on both your file details and your workspace.

File submission was interrupted. The file is locked and **has not been submitted for registration**.

Resubmit the file for registration, or unlock it using the key button above to continue working.

File submission was interrupted. The file is locked and **has not been submitted for registration**.

You can either resubmit the file for registration, or unlock it to continue working.

The file locks for the user submitting the file and for all other shared users. This means that no one will be able to edit that file until the user who was submitting the file addresses the submission interruption error. This is to ensure the file does not change before the submitter has the chance to finish the submission.

There are two ways the submitter can proceed once a submission interruption error occurs:

1. Go to the file details and resume the submission process ☁ .

2. Unlock the file so that regular editing can resume for all users who have access to the file (including the submitter).

   - Select the key ⚷ from the file details page to unlock the file and confirm this choice.
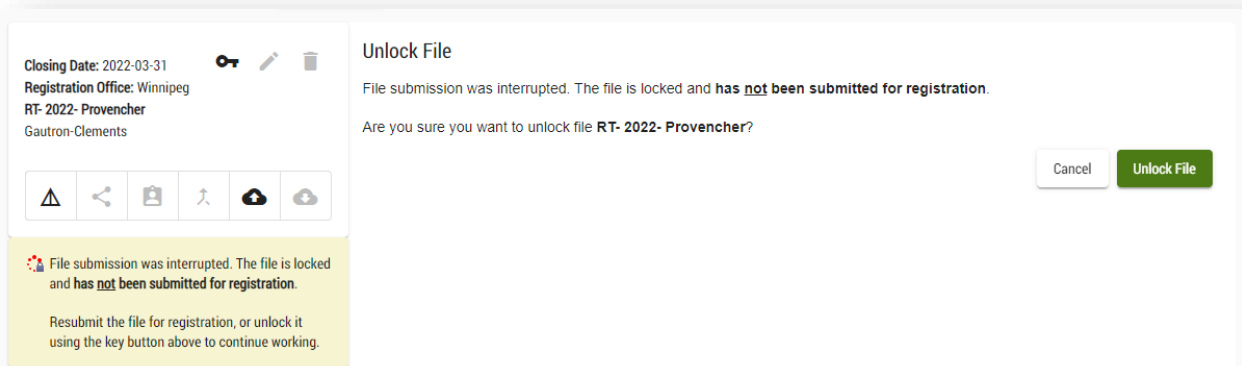

Manage your files

There are several icons that will help you manage your files:

△ [View the file details](#)

< [Share a file](#)

🖻 [Change ownership](#)

人 [Merge file content](#)

☁ [Submit a file for registration](#)

☁ [Download an entire file](#)

🗑 [Delete a file, an eForm or a supporting document](#)

✎ [Edit a file, an eForm or a supporting document](#)

⇥ [Move an eForm to a different file](#)

View file details ⚠

Think of this as your file's home page. This is the default view of all files and is your starting point for any further action. You can view a summary of everything you have uploaded to your file from the file details.

Share a file 🔗

Sharing a file is a useful feature when more than one person in your firm will need to have access to the content of a file. eRegistration won't share your file with any other user automatically.

You must share the file with a lawyer in your firm if you want to identify them as a supervising lawyer during the submission process:

Supervising Lawyer for this Submission

You may specify a practising lawyer who is supervising this submission. This person together with the submitter will be the primary contacts for corrections or supplementary evidence.

○ There is no supervising lawyer for this submission
○ There is a supervising lawyer for this submission

Manage File Share Settings `File is not currently being shared`

Sharing a file will let a user view the contents of the file. You can allow a user to

- add eForms, signature pages and supporting documents (Add)
- delete eForms, signature pages and supporting documents (Delete)
- submit the file for registration (Submit)
- receive selected notices (Notify)

You can also stop sharing with a selected user. This takes effect when you save the share settings.

Once the file is submitted for registration, existing users and their share settings cannot be changed. You may add additional users after submission.

Manage users and permissions   **+ Add User**

Firm	User	Add	Delete	Submit	Notify	
▼	▼	☐	☐	☐	☐	🗑

☐ Use this share list for new file shares ⓘ

Manage notices

Notify selected users when:

☐ eForms are uploaded to or deleted from this file
☐ This file is submitted for registration
☐ The registration is accepted or rejected, or its status changes to deficient

Notify me when:

☐ eForms are uploaded to or deleted from this file by other users
☐ This file is submitted for registration by other users

Share to users with the following comments

Once the file is submitted for registration, existing users and their share settings cannot be changed. However, you may add additional users to view or download the file after submission.

To share a file:
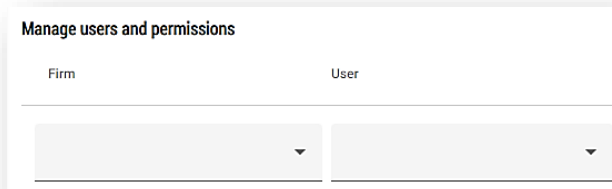

| 1 | Navigate to the file you would like to share from your Workspace. |

| 2 | Click on . |

| 3 | Select the firm name of the user you want to share with from the drop-down list.
• Start typing the name you are looking for and eRegistration will search the firm list for matching firms.
• Only firms who have been approved for access to eRegistration will be available in this list.
• You can share with any firm approved to use eRegistration. |

| 4 | Select the user associated to the firm that you want to share with.
• Start typing the name you are looking for and eRegistration will search the user list for matching users.
• Only users who have access to eRegistration under the firm you selected will show in the drop-down list. |

Tip ▶ Need to share with more than one person? Add more users by clicking
+ Add User .

5   Select each user's permission level.

- Select all, none or any combination to build a personalized permission level:

Add ☐	Allows the user to add eForms, signature pages and supporting documents to the file.
Delete ☐	Allows the user to delete eForms, signature pages and supporting documents from the file.
Submit ☐	Allows the user to submit the file for registration.
Notify ☐	The user will be notified based on the notice option identified in step six.
Add Delete Submit Notify ☑ ☑ ☑ ☑	Gives the user all permissions.
Add Delete Submit Notify ☐ ☐ ☐ ☐	Gives the user read only permission.

6   You can save your list of share users if you commonly share your files with the same people.

☑ Use this share list for new file shares ⓘ

You may save a list of users you commonly share files with.

They will be pre-populated in the share list the next time you share a file. If you uncheck this option, your shared list will be removed and unavailable in the future.

7 Choose the type of notification(s) you want the shared users to receive.
- These selections will apply to all shared users with have been granted permission (meaning if no one has been granted notify permission then these options are obsolete).
- Just like with user permissions you can choose one, all or even none.

Notify

Notify selected users when:
☑ eForms are uploaded to or deleted from this file
☐ This file is submitted for registration
☐ The registration is accepted or rejected, or its status changes to deficient

- The user you share with will receive similar but not identical notifications as the file owner if you give them notify permissions. For example, once a registration is accepted, all users with the appropriate notify permission (owner and shared users) will receive an email notifying of the file acceptance but only the file owner will ever receive the electronic status of title attached.

8 As the file owner, you may also want to know when a shared user completes an action.
- These selections are also optional.

Notify me when:
☑ eForms are uploaded to or deleted from this file by other users
☑ This file is submitted for registration by other users

9 You have the option to include comments with the file you are sharing.
- Any comments you enter while in the file sharing feature will also appear in the file details view located within your folder.
- An email is sent to the user you share with including any comments provided in this section.
- These comments are not submitted with the file and our staff won't see them.

Share to users with the following comments

Please review by the end of today

10 Click **Save Share Settings** when you are ready to share your file.

- You also have the option to **cancel** the request completely.
---

You have now shared your file.

There are two notifications you will see once a file has been shared. All users you have shared with will also see these notifications. Hover over the icon found in one of these locations for more details:

- On the workspace near the registration number.

First Registration Number

5283445/1

- On the file details of the shared file.
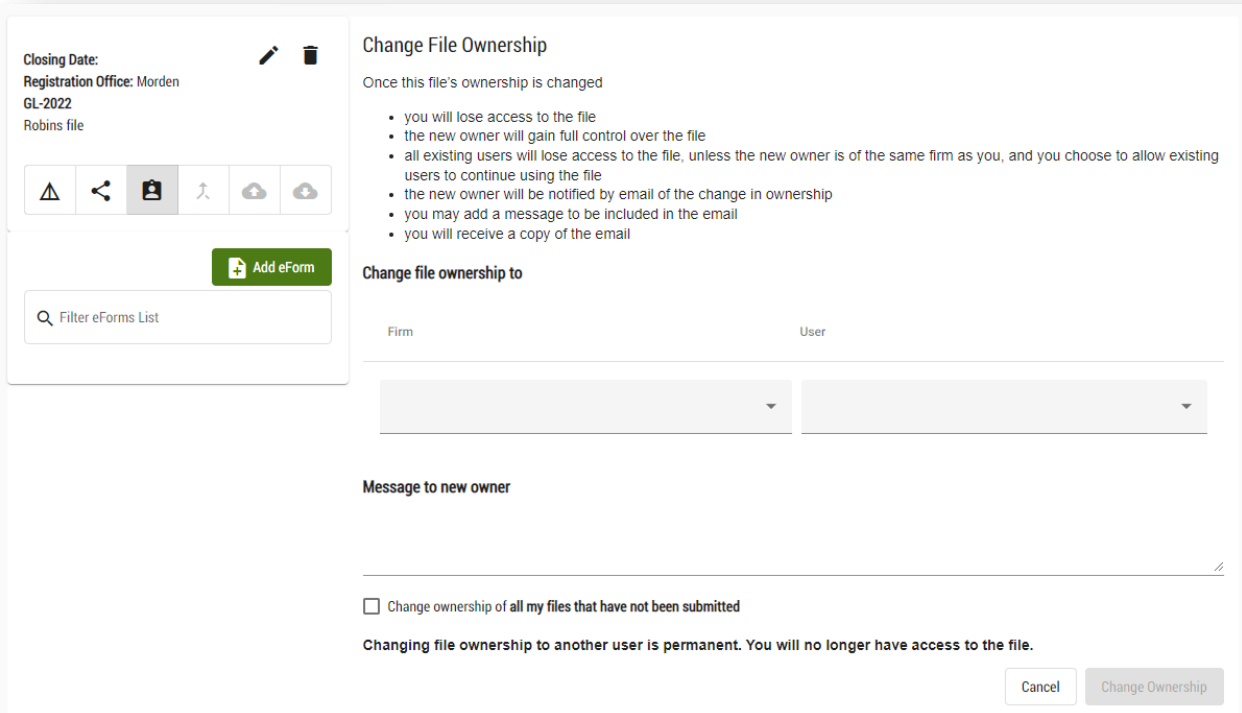

File shared with 1 user
Tip Stop sharing the file at any time by using the ⊘ button to remove one or all users and **Save Share Settings** to update this information.

- This will stop sharing the file with the deleted user.
- You have the option to re-share with them at a later date.

Change ownership 📋

This option is similar to sharing a file. The key difference is that when you change the ownership of a file you will no longer be the person in charge of the file. The person you reassign a file to will take it over as if they were the one who originally created the file.

Keep in mind that once a file's ownership is changed:
1. You will lose access to the file.
2. The new owner will gain full control over the file.
3. All existing shared users will lose access to the file, unless the new owner is of the same firm as you and you choose to allow existing users to continue using the file (see step six below).
4. The new owner will be notified by email of the change in ownership and you will receive of copy of this email.
5. If you need to access or make changes to a file once you change the ownership, the new owner will either have to share the file with you or change the ownership back to you.

Ⓣ Transfer scenario: The transferor's agent will need to change ownership of the file to the transferee's agent so they can both complete and upload their portion of a transfer transaction.

To change a file's ownership:
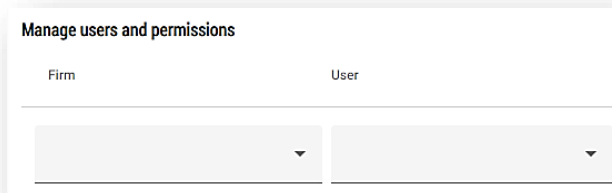

1	Navigate to the file you would like to share from your workspace.
2	Click on ![icon].
3	Select the firm name of the user you want to change ownership to from the drop-down list. • Only firms who have been approved for access to eRegistration will be available in this list. • You can change ownership with any firm approved to use eRegistration.
4	Select the user associated to the firm that you want to change ownership to. • Only users who have access to eRegistration under the firm you selected will show in the drop-down list. • Note that you can change ownership to only one user. **Manage users and permissions** Firm　　　　　　　User [　　　▼] [　　　▼]
5	You have the option to include comments in the file before you change ownership. • These comments are not submitted with the file and our employees won't see them. • These comments will appear in the notification email sent to the new owner. **Message to new owner**
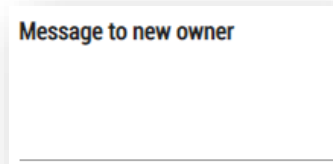

6   You have the option to change the ownership of **all of your files** that have not been submitted to the user you have defined. This will move **every file** you have in your workspace to the new user.

- You cannot change the ownership of files that have been submitted.
- You cannot change the ownership of files that you are not the owner of.

☐ Change ownership of **all my files that have not been submitted** to Martin H Short of Martin, Chase and Short

7   Click Change Ownership when you are ready to share your file.

- You also have the option to **cancel** the request completely.
- To reverse the reassignment once it has been completed you must have the person you assigned a file to reassign it back to you.

You have now changed the ownership of your file.

✔ **File Ownership Changed**

The ownership of this file has been changed to Al-Mugrim Hapas of Teranet CMS.

This file has been removed from your Workspace.

Return to Workspace

Merge file content

Use this feature to merge two files together. You may want to do this if you have forms in more than one file that you need to combine.

Transfer scenario: You are acting on behalf of the purchaser (transferee) and have created a file to upload the mortgage. In the meantime, the agent for the seller (transferor) has changed the ownership of the file containing the transfer to you. You now have a file with the mortgage (current file) and a separate file with the transfer (target file) that need to be merged into one file.

Keep in mind that once you merge a file:
- The eForms, signature pages and supporting documents in the current file will be moved into the target file.
- The current file will be deleted.
- Users of the current file will not gain access to the target file.
- Users of the target file will have access to the new content.
- All existing submission errors and warnings of the moved content will be removed.

To merge two files:

1   Navigate from your workspace to the current file (the one you want to merge into the target file).
    - You will not be able to merge a file if you do not have permission to do so
        - For example, if someone has shared a file with you and given you read only permissions, you cannot merge to that file.
    - You also cannot merge to a file that has already been submitted for registration.
    - You must be the owner of both files to be able to merge them together.

2   Click on ⅄ .
3   Select the target file you want to merge to from the drop-down list.
    - The list will display all of the files you have in your workspace that you have permission to merge to.
    - For example, if someone has shared a file with you and given you read only permissions, you will not be able to merge to that target file.
    - You also cannot merge to a file that has been submitted for registration.

    > Target file
    > DF-2022-Main-Walters file ▾

4   Confirm that you have entered the correct information.

    > Are you sure you want to merge the content of **PF- 2021-Waterfront** into **DF-2022-Main**?

5   Click **Merge Content** when you are ready to merge your file.
- You also have the option to **cancel** the request completely.
- There is no option to split a file.
  - You would have to move each document one at a time to a new file using the ⤏ icon next to the eForm you want to move.

You have now merged two files into one.

✅ **File Content Merged**

The content of this file has been merged into the target file 338039.

File 337351 has been deleted from your Workspace.

Go to Target File
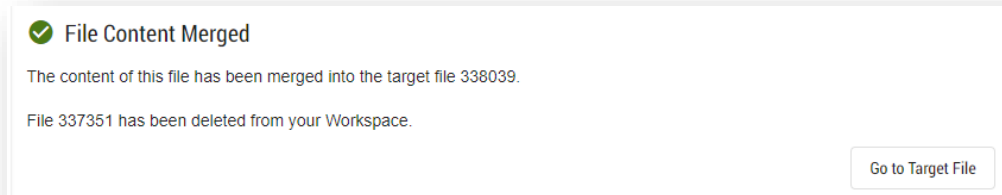

Download a file

You can download your entire file contents any time before or after submission.

> **Tip** Files will be deleted 7 calendar days after they have been accepted or 60 days after they have been rejected. If you want a copy of the submitted file you'll have to download the file before this time frame is up.

To download a file:

1	Navigate from your workspace to the file you want to download.
2	Click on .
3	Save the downloaded items to your computer. • The file will be downloaded as a .zip file, named using your original file name, and will contain every item from your file. • If you do not want to keep all of these items you can edit the .zip file once it's been saved to your computer.

You have now downloaded your file.

File status

There are several actions that will take place depending on the status of a file. Once submitted, the status of the file won't be updated within eRegistration so be sure to watch for the following notifications.

Accepted

The following will occur when a file is accepted:

1. An automated email confirming a file has been accepted will be sent to the user who submitted the file for registration.
   a. This will be sent to the user's notification email if they have one or their primary email if they don't.
   b. The electronic status of title/instrument will be attached as a PDF (one status) or ZIP file (multiple statuses).
   c. If there is no email address associated the notification will be sent to the firm admin email address.

2. The same automated email (without an attached status) will also be sent to anyone the file owner shared the file with who has been given the following notification permissions:

3. The Client File Report will be auto-emailed to the firm's account administrator.
   a. The Client File Report is not emailed at the same time as the status of title. You will receive this email after 5pm on the day after acceptance.

4. You'll have at least seven days to download the file from eRegistration after acceptance. After this time, the file may be automatically deleted from your workspace.

Deficient

The following will occur if a file is marked as deficient:

1. An automated email notifying that a file is deficient will be sent to the user who submitted the file for registration.
    a. This will be sent to the user's notification email if they have one or their primary email if they don't.

2. The same automated email will also be sent to anyone the file owner shared the file with who has been given the following notification permissions:

3. A follow-up email will be sent dealing directly with the file outlining the deficiency reasons in detail.

Rejected

The following will occur if a file is rejected:

1. An automated email confirming a file has been rejected will be sent to the user who submitted the file for registration.
    a. This will be sent to the user's notification email if they have one or their primary email if they don't.
    b. The electronic copy of the rejection reasons will be attached (PDF).

2. The same automated email (without an attached rejection reasons) will also be sent to anyone the file owner shared the file with who has been given the following notification permissions:
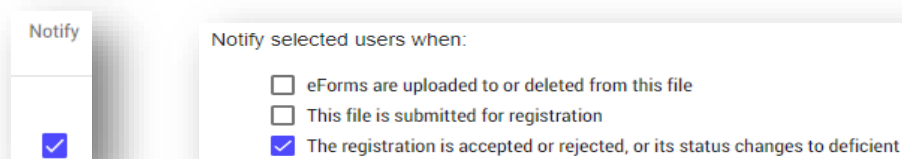

3. The Client File Report will be automatically emailed to the Account administrator.
    a. This will happen the day after rejection after 5pm.

4. You'll have at least 60 days to download the file from eRegistration after acceptance. After this time, the file may be automatically deleted from your workspace.

5. To re-submit a rejected file, you must create a new file in your workspace. You cannot re-use the file that was rejected.

Contact information

Please direct any questions or concerns with regards to eRegistration to our Client Service Team at clientservice@teranet.ca.
